I-Learn Instructor Navigation

Summary: This tutorial reviews the basic navigation options you’ll need to access and use I-Learn’s instructor tools.

Control Panel

To access I-Learn’s instructor tools, click on the Control Panel link on the course’s main menu.

Course content areas, course tools, course options, user management tools, and assessment areas are all accessed through this control panel.
Display/Edit View

You can also access the instructor view of the course by toggling between the display view (the student’s view) and the edit view (the instructor’s view). To move between the two, just click on the link in the upper-right-hand corner of any content area.

Clicking on the edit view will open up the instructor’s view of the content area and allow you to modify content and see content hidden from students.

Clicking on the display view will switch you back to the student’s view of the same content area.
